

SIGNAL ROT ATLAS

APPLICANT IDENTITY

Zazie Kanwar-Torge
Zazie Productions LLC

GEOGRAPHIC ORIGIN

Asheville, NC 28806

PROPOSED DURATION

1-2 Weeks Intensive

DISCIPLINARY SCOPE

Electroacoustic Composition
Spatial Sound Architecture

>> PROJECT FOCUS

Signal Rot Atlas is a project exploring what happens when digital audio breaks down. I am interested in how sound changes when it is pushed past its limits through repeated resampling, clipping, and spatial feedback. Instead of treating digital artifacts as mistakes to fix, this project uses them as the core musical material, building a library of sounds based on generation loss.

RESIDENCY AIM

An open, practical workspace for improvisation. The goal is not to execute a strict script, but to discover how digital degradation behaves when mapped intuitively into real acoustic spaces.

FIG 1.0 // WORKSPACE FRAMEWORK SKETCH

>> PRIMARY SIGNAL FLOW

>> WORKSPACE APPROACH

The project uses Logic Pro as the primary compositional environment, structured as a flexible signal architecture. Audio is processed through layered recursive chains: granular re-synthesis, bit-depth and sample-rate reduction, convolution reverb at extreme settings, and automated feedback routing that treats the session itself as a generative system. Each iteration produces stems that are bounced, reimported, and processed again, so the signal degrades and mutates across generations rather than being refined toward a fixed output.

ENVIRONMENT: LOGIC PRO	GRANULAR SYNTHESIS
RESAMPLING	SPATIAL SPREAD

>> GUIDING PROCESS

01. MATERIAL ITERATION

Audio is rarely kept in its first state. Stems are bounced and re-imported to process them again.

03. OPEN SPACE

Leaving room to swap methods. The speaker geometry is a tool to play, rather than a final mix to satisfy.

02. DEGRADATION AS METHOD

Embracing loss, masking, and digital failure as musical textures rather than technical errors.

04. DOCUMENTATION

The artwork is the recorded process of the failure state happening in real-time within the studio.

> > DIGITAL LOGIC

Within the DAW, sound is processed using broad categories of manipulation: granular synthesis, sample-rate reduction, tape emulation, and heavy equalization. These layers are organically grouped and automated to map the artifacts outward. The setup is left entirely open to allow freely swapping methods and discovering new textures.

Art Zoyd Studios occupies a specific and irreplaceable position in the electroacoustic landscape: a facility built not around conventional studio production but around the active relationship between composition, spatial computing, and physical acoustic behavior. The RIM model, a technically fluent collaborator embedded in the residency itself, mirrors the core logic of Signal Rot Atlas: sound as a system that produces meaning through interaction with its own constraints and environment.

STUDIO INTENTIONS

- > Freely assign and swap signal routing to the speaker arrays to discover spatial balances organically.
- > Improvise with live effects and feedback layers physically within the room layout.
- > Test how extreme digital distortion behaves when separated across different channels.
- > Use the residency directly as an open workspace to experiment rather than executing a strictly predefined technical script.

WHY ART ZOYD STUDIOS

The studio's 70m2 multichannel room, its multipoint listening infrastructure, and its combined instrument, electronics, and computing hardware are the specific conditions this project cannot replicate elsewhere. Binaural and stereo degradation sketches require physical speaker arrays and a knowledgeable interlocutor to test how generation loss actually behaves in air. That combination exists here, and not in many other places. The residency output will be a documented archive of degradation states: recorded stems, spatial configurations, and process notes forming the source library for a completed acousmatic work.

ARTIST CONTEXT

ZAZIE KANWAR-TORGE (B. 2006)

Zazie Kanwar-Torge (A.K.A Zazie Productions) is a multidisciplinary artist, composer, and sound designer working across electroacoustic music, acousmatic composition, experimental film, and multimedia art. Drawing from the traditions of musique concrète, outsider composition, IDM, and immersive audio design, his work combines binaural recording techniques, granular synthesis, found-sound processing, degraded digital textures, and irregular rhythmic structures to create psychologically immersive sonic environments.

Homeschooled within the experimental pedagogical lineage of Black Mountain College, he began developing a self-directed electroacoustic practice at an early age. At fourteen, he was commissioned to reinterpret Erik Satie's Gymnopédie No. 1 through musique concrète techniques. The resulting work,

Cheaper Impressions (a fragmented homage to John Cage), later became the centerpiece of his 2020 EP Stutter to Stammer.

Influenced by the acousmatic tradition and the work of Pierre Schaeffer, his compositions frequently explore memory degradation, recursive digital transformation, spatial perception, and emotional dislocation through iterative sound processes. His work has appeared in Metapsychosis and has received praise from Lydia Lunch and Bryan Lewis Saunders.

Alongside independent album releases, film scoring projects, and experimental audiovisual works, he continues to develop a post-institutional artistic practice centered on sound as an unstable architecture of perception, memory, and atmosphere.

CURATED AUDIO FOCUS

play.reelcrafter.com/PhSrnH1ZRIOz49ikmOAOaw

Spectral Ode to Synesthesia / Cheaper Impressions / O- / 97.8F / Slippage Beyond The Hyperlink

SELECTED DISCOGRAPHY

ALBUMS

Stutter to Stammer	2020
Constrained Capacity	2022
To Halt Space Adrift	2023
Vermiform	2023
A Long Way To Nowhere	2023
Greetings From Tinsel Time	2023
Stutter to Stammer (Super Deluxe)	2024
Greetings From Tinsel Time (Super Deluxe)	2024

EPs / SINGLES / COMPILATIONS

Interference Archive 01010101	2022
Distant Bells for Surgical Minds	2023
Miraculously Unhurt	2023
Spectral Ode to Synesthesia	2025
Dissonance Index Vol. 1	2022 curator
Who is the Dreamer? / Argali	2023 feature
Voidstar Solidarity / ACLU benefit	2022 feature
Cheaper Impressions / BMCM+AC	2020 commission

SELECTED PROJECTS & EXPERIENCE

CV SUPPLEMENT / DATA

SELECTED WORKS

COMMISSION

Cheaper Impressions (2020)

Black Mountain College Museum + Arts Center
Commissioned musique concrete homage to Cage and Satie.
Selected 2021 BMC Radio Artist by BMCM+AC, AshevilleFM, and Make Noise.

PUBLICATION

Spectral Ode to Synesthesia (2025)

Metapsychosis: Journal of Literature & Consciousness
Acousmatic text and audio work on neurodivergent perception and synesthetic listening.

CURATION

The Vanishing Point Syndicate

Experimental Sound Label
Founded artist-led label; curated Dissonance Index Vol. 1, 105-track international compilation.

RELEASE

Who is the Dreamer? / Argali Records

Conceptual composition on experimental David Lynch tribute compilation.

FILM & AUDIOVISUAL

Phantom Requiem (2024)

Director, Composer, Sound Designer
Jury Special Mention, Pebbles Underground;
VisualcontainerTV Winter 2024 Award Winners; Special Mention, Kvikmyndalistahátíð Islands, Reykjavik.

MIKE HAS A VISITOR (2025)

Composer

The Haunted (2025)

Composer

Choleric (2025)

Composer, Producer

Expire (2025)

Sound Designer, Audio Engineer

TRAINING & CONTEXT

WORKSHOP

CCRMA / Stanford (2025)

Virtual Acoustics for Immersive Audio, spatial audio hardware translation.

FRAMEWORK

School for Poetic Computation (2020)

Audio-Visual Synthesis & Generative Systems.

FORMATION

Black Mountain College Region

Self-directed electroacoustic practice; Pulitzer Center Finalist (2021).

EXHIBITIONS

The Wrong Biennale 2025-26

Infinite Self Pavilion / Cybernetic Futures Institute
Curated by Dr. Lila Moore. Roster includes artists from SIGGRAPH, Ars Electronica, and Documenta.

In Dreams (2025) / Le Gateau Gallery

Group exhibition, international roster.

New Media Art Space / Ripples Gallery

PRESS & RECOGNITION

INSTITUTIONAL

BMCM+AC, Pulitzer Center, Metapsychosis Journal

RADIO

AshevilleFM 103.3, Glacier FM, Indie AM, Five Steps From The Fringe

PRINT

Black Noise Magazine, HEAVY Magazine, Ranger Magazine, Superpresent

LITERARY

Red Ogre Review (2025), Switch Microfiction (2025), Maude Literary Journal

AFFILIATIONS

BMI · Registered Artist

MUSE · Musicians United for Social Equity

Rhizome / New Museum · Donor, Member

IFP / The Gotham Network · Associated Creator

INDEPENDENT RESEARCH

Co-authored independent research, published Academia.edu (2025).
